I have a dual role in the health board. I work clinically in primary care as a Physician Associate (PA). I am part of the multi-disciplinary team that assess and manage patients in primary care across the health board. My second role involves the promotion of the role of physician associates in the health board and across Wales. I am involved in supporting my PA colleagues - holistically and professionally including mentoring and support in furthering their knowledge and skills. I also represent the role of PAs nationally.

I enjoy working with my colleagues to help them develop their skills and progress their careers. I enjoy supporting all colleagues, from newly qualified to those with more experience.

I joined the profession after graduating with a post-graduate diploma in physician associate studies in 2012. I've been working in the NHS for 11 years and I believe we are always there for those who need us.
